

DHS Lighting (Asia) Limited Background

DHS Lighting is a professional lighting consultant with design and supply of smart lighting solutions such as LED light, energy saving lamp, outdoor light, LED advertising system and underwater lighting.

Customer satisfaction and technology innovation are our basic concept of our products. DHS has a proven track record of helping companies maximize the potential business benefits of using LED lighting. By combining the most advanced digital control system, design rendering and lighting fixture designs with our energy audit standards and performance, DHS becomes your long-term partners for lighting consultant.

DHS Lighting is your long-term partnership in lighting design and build project consultant.

Our Message ...

We have stressed the easiest way for people to be innovative in their design is to think out-of-the-box, to break their paradigms or mindsets, their ways of thinking. To drive hybrid solutions in their lighting environment is to think out of the box in a new way of integrating an art and a science of lightings.

Why use DHS Lighting

- 1. Professionalism. As lighting designers concerned with light, we look to enrich our craft by expanding our possibilities to create room for great ideas. DHS Lighting in lighting design is to establish justification for why we add light to a space. We have reason for being, and to create opportunity for good lighting design.
- 2. Value for money. We provide cost saving and value for money onestop solution for our clients, from design and build, to supply and install. We truly get a feel for the importance of light integration with sustainability of design.
- 3. Quick Response and quality service. Excellent service level, currently supporting world-class clients, like HSBC, Citibank, HKEX and etc.
- 4. Life Cycle. The life of LED fixtures is defined according to the L/0 standard, which measures the useful life of a fixture based on the estimated time at which the LED light output will depreciate to 70% of its initial rating. The life cycle of the LED can reach up to 8 years life span for certain LED products.
- 5. Environmental Saving. Can help clients to save over 70% energy with traditional lighting design.

Our clients and more.

Developing Lighting Ideas

DHS Specializes in Lighting Design. To develop lighting ideas, we will see that we are giving ourselves the opportunities to apply:-

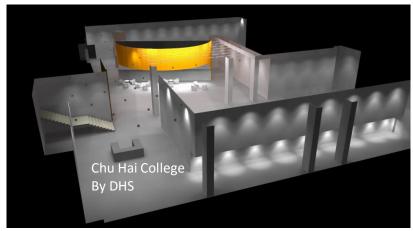

- Think carefully and see any room as a collection of surfaces.
- We identify specify objects first and visualize light on those specifies.
- Consider the five layers of light.
- Consider the controllable aspects of light
- Consider all the ways we can deliver the light we are after.

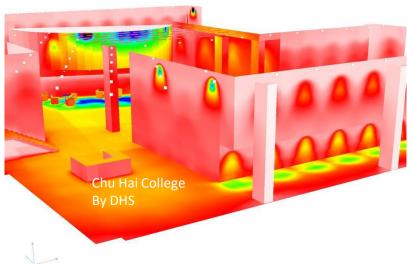

- In our design process, we should vow never to design by drawing lighting symbols straight away.
- We create light maps to show whatever architectural or environmental information the designer has available with lighting graphics applied on top. And Rendering is applied to show the five layers of the light for demonstration.
- Keeping these light levels in mind while designing and discussing light, DHS will provide all of the intuitive knowledge needed to engage in designing of lighting levels for basic spaces.

SOLUTION FOR SMART LIGHTING

DHS Smart Lighting System

DHS offers remote controlled lighting system for your home or commercial applications. You can create your scene mode of how the lighting is changing: according to your time schedule or commercial needs. All you need to do is to wait for the time schedule activated or press scene key of "Work Mode" to have varies changing mood of the lights.

SOLUTION FOR SMART LIGHTING

DHS Lighting (Asia) limited

DHS offers future of smart lighting system to integrate environmental sensor, lighting products with user engagement to build the connected network for lighting control system.
